

Serviacero USA

serviacero
USA

At Serviacero USA, we specialize in manufacturing and fabrication of metal bar gratings for light-duty and heavy-duty usage, perimeter fences, architectural elements and stair treads for the following sectors: infrastructure, construction, warehouses, mining, power and energy industries.

We guarantee the reliability of our processes under quality and continuous improvement systems; we are focused on meeting the needs of our customers. We are active members of the **NAAMM** (National Association of Architectural Metal Manufacturers) association that represents manufacturing standards and electro-forged bar grating engineering designs.

We continually make investments to keep us at the forefront and expand our range of products and services.

GRATING PRODUCTS

Electroforged light traffic grating

Designed to facilitate the passage of liquids, air, and light, ideal for environments that require drainage and ventilation.

Electroforged heavy traffic grating

It withstands high loads without deformation, thanks to its thicker sole and reinforced structure.

Security Fences

Constructed from strong, durable galvanized steel with a robust design, it features a solid and secure anchoring system.

Architectural Elements

Each product is designed to excel in both aesthetic appeal and practical utility.

GRATING PRODUCTS

Electroforged Stair Treads

The perfect solution for stair structures that demand strength.

Mezzanines

Versatile solutions that transform environments, adding an extra dimension to meet your specific needs.

SERVICES

Electroforged grating finishes and elements

We customize our solutions to meet specific needs, integrating durability, aesthetics, and resilience into every finish.

Electroforged bar grating cutting and welding

We are experts in cutting and welding, ensuring that structures are tailored to specific needs.

Manufacture of special electroforged gratings

We adapt to specific projects, offering tailored solutions with high-quality standards.

Engineering and design of electroforged grid elements

Our team of dedicated experts is committed to bringing your ideas to life.

We proudly introduce our subsidiary companies in Mexico. **We are the most comprehensive group** of integrated steel solutions in the country.

serviacero®

serviacero
especiales

Dedicated to the commercialization and processing of bars and plates of alloy steels, aluminums, stainless steels, dimensional measuring equipment and engineering plastics.

serviacero
electroforjados

Manufacturing and enabling bar gratings for light-duty and heavy duty traffic, perimeter fences and architectural elements.

serviacero
WORTHINGTON

Dedicated to the commercialization and processing of bars and plates of alloy steels, aluminums, stainless steels, dimensional measuring equipment and engineering plastics.

serviacero
comercial

We specialize in the processing and commercialization of carbon steel for the metalworking industry, equipment manufacturing and construction industries.

serviacero
componentes

We specialize in the manufacture of metal components for the industry, through cutting, bending, machining, welding and painting processes.

serviacero
tubulares

Dedicated to the manufacturing and production of tubular products for the Heavy Machinery, Construction, Metal Mechanics, Appliances, Furniture, Greenhouses and Automotive industries.

serviacero
ORBIS

We design and manufacture solutions of packaging products includes racks, containers, baskets, dollies, pin pallets and assembly for the industry.

Your Reliable Supplier
